

FST-175 : 12 Port Rack Mount Splice & Patch Panel

Description:

The FST-175 is capable of splicing and terminating up to 12 fibers. The universal side mounting brackets make this unit capable of mounting a standard 19" or optional 23" rack. The versatile swing-out shelf make connector panels easily accessible. Each unit accepts one splice tray and two six-pack adapter panels or modules with a variety of connector options. This panel provides a durable and economical solution for low-density fiber optic applications.

Typical situations include when outside plant cables are terminated onto the back of a connector panel or where pigtail assemblies are spliced on to the incoming cable. These panels are customizable with the option of being delivered pre-assembled with adapters, splice trays, pigtails, cassettes and pre-terminated cables.

Features:

- 1U High
- Reversible 19" or 23" Rack Mount
- Splice & Terminate up to 12 Fibers
- Available in Beige or Black
- Easy Front & Rear Access
- Swing-Out Shelf

Specifications:

Part Number	#151012
